

PRUNING

PRUNING PLANTS HELPS THEM GROW HEALTHIER AND STRONGER. IT'S IMPORTANT TO PRUNE PLANTS IN OUR HYDROPONIC GARDEN TO ENSURE PLANTS GROW WELL AT A SIMILAR RATE. THE PLANT LIGHT NEEDS TO STAY AROUND 4 INCHES ABOVE PLANTS. IF SOME PLANTS GROW FASTER THAN OTHERS, IT MEANS THE SLOWER GROWING PLANTS WILL NOT RECEIVE THE NEEDED AMOUNT OF LIGHT.

THYME

PRUNE THYME ONCE PLANT REACHES 8-10 INCHES TALL, LEAVE ABOUT 4-5 INCHES TO CONTINUE GROWING

PARSLEY

PRUNE PARSLEY AFTER STEMS HAVE SEGMENTED, LEAVING SOME SEGMENTS TO CONTINUE GROWING

TO USE FRESH PARSLEY OR THYME, CUT OFF LEAVES TO USE IMMEDIATELY OR STORE IN FRIDGE FOR LATER

CHAMOMILE

PRUNE CHAMOMILE AFTER FIRST HARVEST, LEAVE ABOUT 4-5 INCHES TO CONTINUE GROWING
*CAN ALSO PRUNE CHAMOMILE IF IT GETS LEGGY OR SPINDLY

TO USE FRESH CHAMOMILE, CUT OR PINCH OFF BLOOMS TO USE IMMEDIATELY OR LAY BLOOMS IN A SINGLE LAYER TO DRY FOR LATER USE

*DRY COMPLETELY BEFORE STORING IN AIR TIGHT CONTAINER
